

# Cross Sections

## 127th Street

# Improvements

Mur-Len to Black Bob | Black Bob to Pflumm

### Without a median and With a median

The proposed cross section accommodates two travel lanes in each direction as well as a four-foot wide striped bicycle lane. On the north side, an eight-foot wide multi-use path will be constructed from Mur-Len to the Indian Creek Trail (just west of the Olathe East High School). Further east a six-foot wide sidewalk will be constructed. A continuous six-foot wide sidewalk will be constructed on the south side between Mur-Len and Pflumm.

The lane configurations of the roadway cross section vary to accommodate a two-way left turn or center lane as well as exclusive turn lanes. This is referred to here as **without and with a median**. The plan views show the location of the median and the breaks that allow cross movement.

The roadway section is typically 100 feet wide, although the width and location of the alignment may vary. Please see the plans for locations of retaining walls.
